CRISTIANO VILAS BOAS

Milharado, Portugal · cristiano.vb@icloud.com · LinkedIn

Business & Product Strategy · On-Chain Finance · Ecosystem Growth

EXECUTIVE PROFILE

For nearly a decade I have worked at the intersection of product, business, go to market strategy and ecosystem development, helping protocols from early architectural concepts to live systems with liquidity, integrations, and real adoption. I scale financial infrastructures by translating complex protocol mechanics into strategic partnerships and go to market strategies.

What I bring is a business development experience with the ability to close high-stakes integrations, shape market narratives and build community pipelines, all backed by hands-on engagement and product management experience.

CORE STRENGTHS FOR THIS ROLE

Business Development

- Ecosystem partnership design & execution
- Technical integration pathways
- Protocol-to-protocol BD
- GTM strategy for DeFi primitives
- Market positioning & narrative
- IRL deal-making & events

Product & Protocol Fluency

- 0→1 protocol architecture & launch
- CDP, money market & RWA mechanics
- Tokenomics & incentive design
- Collateral risk frameworks
- Wallet architecture & AA
- Cross-chain interoperability

Community & Growth

- Community-to-capital pipeline design
- Incentive & participation systems
- Onboarding flow architecture
- Protocol narrative & communication
- Branding & market positioning
- Web2→Web3 conversion systems

PROFESSIONAL EXPERIENCE

PROFESSIONAL EXPERIENCE

Chief Executive Officer · Orki Finance · Subvisual Venture Studio *2025 / 2026*

Designed and launched a 0→1 CDP-based stablecoin protocol on Swellchain, optimized for staking and restaking economies. Led all BD, ecosystem integrations, protocol positioning, and go-to-market execution alongside full product and architecture ownership.

- Closed ecosystem integrations with infrastructure and protocol stakeholders, structuring partnership terms, integration scopes, and co-marketing arrangements from scratch
- Generated $1.5M TVL within 48 hours of launch through coordinated narrative and ecosystem alignment, zero LP deals; adoption driven purely by positioning and partner relationships and incentives.
- Designed the collateral model, tokenomics, incentive flows, and liquidation mechanics calibrated to audit-grade economic security standards (Gauntlet / Chaos Labs methodology)
- Built and managed cross-functional execution across product, engineering, community, and external partners simultaneously
- Led full protocol narrative, branding, and communication architecture, translating complex financial mechanics into partner-facing and market-facing use cases

Strategic Advisor · Dippi / Functor Network *2023 / 2024*

Advised a Web3 infrastructure project at a critical architectural inflection point providing product direction, ecosystem positioning, and strategic clarity through a fundamental pivot.

- Led product–market alignment and competitive positioning across multiple strategic cycles
- Facilitated discussions with Chainlink, ConsenSys, Brume Wallet, and Chainup and more, bridging technical capability to ecosystem leverage
- Provided architectural advisory on ERC-6551 wallet systems, scalability trade-offs, and user segmentation strategy
- Identified a structural misalignment between traction metrics and protocol fundamentals; directed a strategic pivot toward a key-storage infrastructure layer, preserving the team's core technical differentiation
- Directed research programs across MPC key encryption and retrievability, mix-net inspired P2P models, and fully homomorphic encryption frameworks

Community & Incentives Lead · Public Pressure *2022 / 2023*

Designed behavioral infrastructure for a digital music and Web3 participation platform, operationalizing incentive systems that converted passive audiences into active protocol participants.

- Designed incentive and quest systems to engineer retention and active participation loops at scale
- Built internal operational infrastructure reducing execution friction across distributed creative teams
- Advised Francesca Versace and Sergio Mottola on Web3 community and digital asset positioning

Portugal Lead → Product Relationships & BD · Harmony Protocol*2020 / 2022*

Entered as a grassroots ecosystem builder; progressed into product-facing and business development roles. Served as a structured bridge between external ecosystem projects and core protocol resources.

- Acted as integration pathway and grants coordinator between ecosystem projects and protocol engineering resources
- Supported liquidity and ecosystem incentive design, including early conceptual work on NFT-boosted liquidity structures predating their wider adoption
- Conducted research into UBI and reward distribution systems applicable to on-chain participation economies
- Designed Web2→Web3 onboarding flows and community growth systems, converting off-chain audiences to protocol participants

Owner · UPSE — Solar & Hydraulic Systems *2019 / 2021*

Built a renewable energy company from 0→1. End-to-end operational, commercial, and technical execution, project scoping, supplier negotiation, installation management, and client delivery. Full-cycle founder discipline in a capital-intensive physical business.

Operator & Quality Control · Hovione *2017 / 2019*

Operated in GMP-regulated pharmaceutical manufacturing. Developed rigorous process discipline, 5S methodology, and exposure to automation systems in high-compliance production contexts.

Fraud Analyst · Randstad (EDP) *2013 / 2017*

Applied data analysis for fraud detection and prevention inside a major utility. Foundational training in analytical rigor and structured risk pattern recognition, directly applicable to on-chain risk surface analysis.

EDUCATION & CONTINUOUS DEVELOPMENT

Self-directed and applied, built through direct collaboration with protocol teams, live system design, and hands-on research.

- **Applied Crypto-Economics & DeFi Infrastructure:** Focused on blockchain systems and protocol design; proven across multiple live deployments and direct collaboration with protocol teams.
- **Operational Strategy & Agile Management:** Specialized in Agile, Kanban, and visual methodologies for cross-functional protocol environments.
- **Product Design & Narrative Architecture:** UX design for high-complexity financial systems; expertise in market communication and technical storytelling.
